

Accessibility at Kunstraum

Entrance to Kunstraum's lobby is via double doors at street level, with a 10cm step up. A portable ramp is available (76cm wide x 120cm length). The lobby is 265 x 267cm, with a set of double doors at right angle to the building entrance, leading into the main space. The kitchen, is up a 2cm step and has 68cm wide doorway. The fire escape has three steps down to street level.

Kunstraum's bathroom is not fully accessible due to the size of the space and its doorway but we have tried to make the space as accessible as possible. Please see the bathroom floorpan below for critical measurements and accompanying images.
